ETOP-2017, the 14th International Conference on **Education and Training in Optics and Photonics**, will be held on **May 29-31, 2017** in Hangzhou, China.

The goal of ETOP-2017 is to bring together leading optics and photonics educators from all levels and orientations to discuss, demonstrate and learn about new developments and approaches to teaching in these fields. Through presentations, panel discussions, workshops and exhibits, it is the intent of this conference to prepare professors, students, teachers and professional trainers to optimize teaching techniques in optics and photonics for the future.

Both oral and poster presentations will be included in the conference program. Internationally leading experts will deliver keynote lectures at the ETOP-2017. The directors of the higher education evaluation center of the ministry of education will also be invited to introduce the evaluation standards.

It is expected that 300-350 participants from various countries will attend the conference.

TOPICS:

- Curriculum development in Optics and Photonics Education ;
- New Pedagogical Methods, Tools and Models in Optical Education;
